

CONTENTS

MINING OF MINERAL DEPOSITS

1	B. Sobko, O. Lozhnikov The disturbed lands use factor influence on the technological schemes investment assessment at the mining titanium deposits.....	8
2	B. Sobko, V. Panchenko, V. Lotous, D. Vinivitin Systematization of strategies of surface mining of mineral deposits.....	22
3	V. Azarian The foundation of the structural and functional scheme of quality management technology of the generalized iron ore complex flows at mining and concentrating plants.....	37
4	O. Anisimov General methods of managing the front of mining operations with working out the sides with steep dipping layers.....	46
5	D. Vinivitin, M. Nazarenko, S. Sholokh, V. Panchenko Development of a dynamic approach to solving the problems of operational planning of mining and transport work in the iron ore surface mine.....	56
6	S. Zhukov, S. Lutsenko Studying the influence of ore quarry productivity and development system parameters on intensity of field mining.....	68
7	V. Mamray, V. Korobiichuk, V. Shlapak, S. Iskov, A. Panasiuk Determination of dimension stone cutting productivity by disk saw cutting machines.....	75
8	N. Nesvitaylo, G. Pedro Systematization and analysis of factors, determining eventual depth of quarry.....	84
9	V. Prokopenko, A. Cherep, D. Pilova Modern ecological and economic approach to choice of development of mineral deposit.....	94
10	A. Skachkov, D. Titov, S. Zhukov Control industrial experiments of explosion methods of rocks with differentiated energy saturation of mass.....	111
11	O. Strilets, G. Pchelkin Substantiation of the seismically safe mass of the group of drill charges during explosive works on the construction of metro tunnels.....	119
12	V. Fomychov, V. Sotskov, A. Zaporozhets, I. Nazarov Analysis of the stress distribution changes in the rock mass including coupling of extractive and development workings while varying the geometric laying parameters.....	131
13	O. Shustov, S. Moldabayev, A. Adamchuk Determination the scope of work and terms of commissioning elements of the cyclic-and-continuous technology complexes..	144
14	O. Shustov, M. Petlovanyi, S. Zubko, Ye. Sherstuk Geomechanical problems of stability of natural-technogenic ore deposits.....	154

MINING MACHINERY AND GEOTECHNICAL MECHANICS

15	D. Kolosov, S. Onyshchenko, O. Bilous, H. Tantsura Patterns of stress-strain state of head rubber-cable rope considering influence of disturbed shaft geometry.....	167
16	V. Kravets, K. Ziborov, K. Bass, V. Krivda, S. Fedoriachenko Combinatorial method for determining the optimum flow distribution plan for mining and municipal an electric vehicle and charging stations.....	178

ELECTRICAL COMPLEXES AND SYSTEMS AUTOMATION

17	S. Tkachenko The moist removing control of the grain dryer with a gravitational moving layer.....	193
----	--	-----

ECOLOGY AND LABOUR SAFETY

18	D. Zaikina Justification of perspective directions for ensuring economic security in the occupational health and safety.....	204
19	A. Shapar, P. Kopach Strategic approaches of environmentally friendly technologies application.....	213
