

CONTENTS

MINING SCIENCE

1. **Sobko B., Kardash V.** Justification of efficiency of application of technological scheme for overburden development in conditions of Motronivsky-Annivsky watered placer.....7
2. **Anisimov O.** The solution to the problem of the placement of internal dumps in the development for forming the deep pit edges by steep dipping layers.....17
3. **Baskevich A., Kulivar V., Chobotko I., Kurliak A., Balakin O.** About stability of connection of diatomic molecule in the field of electric charge..26
4. **Bondarenko A., Shustov O.** Substantiation of the parameters of the erosion jet underwater face.....38
5. **Zaikina D.** Justification of co-relation of occupational safety and business profits.....49
6. **Zuievskaya N., Gubashova V.** Stabilization of the soil mass with the injection anchors. Comparative analysis of design features.....58
7. **Lozhnikov O.** Methodological base of recourse-saving technology evaluation at the surface mining of flooded titanium zirconium deposits.....69
8. **Lubenets T.** Determination of the tension of the conveyor belt of the belt conveyor.....81
9. **Mineev S., Makeiev S., Belikov I., Samopalenko P., Golovko A.** Issues of possible ignitions of methane-air mixture in the mine due to the implementation of mechanoelectric and piezoelectric effects during coal mining.....93
10. **Pichka T.** Conversion of the coal microstructure affected by weak electrical fieldaction.....106
11. **Pcholkin G., Valenko O.** Substantiation of technology of development of technogenic deposit of Novotroitsky enterprise.....116
12. **Symonenko V., Cherniaiev O., Hrytsenko L., Cherniaieva O., Synkevych V.** The ecologically safe development of solid non-metallic deposits with transporting by conveyor.....125
13. **Feofanov N., Feofanov A.** Characterization of waste piles by surveying and geodetic measurements.....136
14. **Chebanov M.** Substantiation of the rational installation location of a dragline excavator in the face when working with dump trucks.....143

ENVIRONMENT PROTECTION TECHNOLOGIES

15. **Kovrov O., Klimkina I., Samarska A., Krasovskyi S.** Laboratory investigation of the process of heavy metals bioleaching as an acid mine drainage phenomena.....150
16. **Kolesnyk V., Pavlychenko A., Moniuk I.** Rationale of the calculated method of operating determination of current emissions of district boilers, their indicators of their energy efficiency and the degree of environmental hazard.....162

17. Mulina A., Pavlychenko A. Study of the state of green areas in Dnipro in the area of influence of road transport.....	177
18. Orlinska O., Pikarenya D., Hapich H., Maksymova N., Rudakov L., Chushkina I. Evaluation of technical state and environmental safety of Kilchen irrigation system main canal operation.....	186
<i>MATERIALS SCIENCE AND INDUSTRIAL MACHINE-BUILDING</i>	
19. Belmas I., Kolosov D., Onyshchenko S., Bobylova I. Partial restoration of tractive ability of rubber-cable tractive element with damaged cable base.....	196
20. Dolgov O., Dolgova I., Kolosov D. Crack kinetics in an isotropic plate of variable thickness.....	207
21. Kravchenko Yu., Patsera S. The number of abrasive grains in the contact area and cutting thickness during a grinding process.....	217
<i>APPLIED MECHANICS, CONSTRUCTION AND CIVIL ENGINEERING</i>	
22. Dubelt T. Study of changes of reconstruction durability of residential houses of first mass series.....	230
